WCPSS World Language has adopted a new Modern World Language Curriculum. Since the focus is acquiring the language rather than studying the language, the students will be graded on proficiency. Your student's language proficiency will be evaluated in the four language skills: Reading, Writing, Speaking and Listening. ***The grade will reflect what students are able to do with the Spanish language.***

Spanish I and II proficiency grading will be aligned with the North Carolina Essential Standards proficiency expectations for each level, and their grade will reflect their progress in relation to the proficiency expectation:

	Letter grade
Exceeds Proficiency Expectations - you meet all the required targets and you were able to do more	A
Meets Proficiency Expectations - you meet the required targets. You may have attempted to do more but were not successful	B
Approaches Proficiency Expectations - you are still making mistakes with the target concepts/vocabulary at times, making it difficult to understand you.	C
Below Proficiency Expectations - you are not understanding the targets and cannot express yourself clearly in the target language.	D
Does not attempt Expectations- you are not doing the assessments	F

Level 1(Novice-Mid) and Level II (Novice-High):

70% Summative/Major grades: reading, writing, listening and speaking assessments, projects that require target language input or output. Late major assignments will be 10 points deducted per day late.

30% Formative/Minor grades: quizzes, homework, classwork. **Late Work** is not accepted on minor assignments (homework, classwork). Late work includes homework not turned in on time, class work not turned in but student was present in class, and any other minor assignment not turned in by the due date.

The semester grade consists of:

Quarter 1	40%
Quarter 2	40%
Final	20%
